Inspection Narrative

Abraxas 1, located in Marienville, PA is part of the larger Cornell Abraxas organization that has various similar facilities over several states. Sitting in a very rural setting, Abraxas 1 serves both males and females and is comprised of nine individual dorms for youth, six of which are currently licensed and being renewed. The campus also has an on-site school, as well as other buildings including the cafeteria, administration building, medical, gymnasium and a large amount of outdoor space for the residents to have outdoor activities and recreation. The newer dormitories have an 'A Side' and a 'B Side', with each side having a maximum of 15 residents. These dorms have a large staff office that connects to each side and provides visibility into each side. Both sides of the dorm have their own bathrooms, showers, common area, etc. The older buildings have smaller capacities and a different layout (more like a ranch house), with all of the residents sleeping in one part of the building and other spaces being located at the other end of the dorm.

Over this inspection period of February 1, 2024 through January 31, 2025, Abraxas 1 served 223 youth, many of which were placed from locations outside of Pennsylvania. At the time of the inspection, there were approximately 86 youth receiving services at Abraxas 1. The sample was selected by counting the total number of residents per dorm throughout the licensing period (including discharged youth) and randomly selecting 10% of those records. An effort was made to review files for youth from various locations, including those from out of state.

Although Evergreen Dorm has been licensed at the agency's request, it has been vacant for several years. However, the agency is requesting a continued license in case they choose to expand. Although there are no physical plant issues with the dorm based on a walk through within the past three months,, another physical site inspection would be conducted prior to any residents being added.
